Progetto HeartLet

Presented by

Alessandro D'Orazio

Luca Licata

Daniele Trozzi

Cos'è HeartLet

Perché HeartLet

- Le malattie cardiocircolatorie rappresentano il 34% di tutti i decessi
- Il battito cardiaco è un indicatore del consumo calorico

HeartApp

Future implementazioni

HeartLet può essere migliorato, sia per quanto riguarda HeartDuino, che per HeartLet. Una futura aggiunta potrebbe essere, per esempio, il supporto per dispositivi iOs e Windows Phone
